SKILLS

PROGRAMMING LANGUAGES

- Python
- C & C++
- Java
- SQL
- Javascript
- TypeScript
- React

TOOLS & FRAMEWORKS

- ROS 2 Jazzy
- Gazebo
- Arduino
- VS Code
- Git & Github
- Tinkercad
- JavaDoc
- JUnit

LANGUAGES

French

Native

German

Bilingual

English

B1: Everyday vocabulary

INTERESTS

3D Modeling

3D Printing

DIY/Tinkering

Lego Technic

Cooking

Timothée Pirot

SEEKING 31-MONTH APPRENTICESHIP (AVAILABLE IMMEDIATELY) IN ROBOTICS, EMBEDDED SYSTEMS & IOT

Pursuing a Master's degree in IoT and Connected Objects at EPITECH (3-year program, enrolled 2025).

Seeking a 31-month apprenticeship, available immediately, in robotics, embedded systems, or IoT (1 month in company / 2 weeks at school rhythm).

Mobile across France and Germany.

Work Experiences

Assistant Software Engineer Internship (2.5 months)

From July 2024 to September 2024 **Teads** | Montpellier, France

- Responsible for front-end integration of a recommendation feature into the existing interface

Seasonal Employment (5 years)

From 2018 to 2022 **Warema** | Marktheidenfeld, BY, Germany

- Production line work, rigor in industrial environment (3 months per summer)

Projects

3DOF Robotic Arm Simulation (3 weeks)

July 2025 **Personal Project** | (ROS2, Gazebo, Rviz)

- Robot modeling in URDF/XACRO and ros2_control integration

Lego Technic Robotic Arm Project (2024/2025)

From 2024 to 2025 **Personal Project** | (Python, Lego Mindstorms)

- Autonomous design with sensors, motors

Odyssée du Dé - Modern Board Game (3 weeks)

From November 2025 to December 2025 **Student Project** (Java/LibGDX)

- Graphical interface, event system and AI for optimal move selection
- Unit testing with JUnit to validate business logic and game rules

Volunteer Experience

EVOLUTeK Member (Robotics Association)

Since November 2025 **EVOLUTeK** | EPITECH

- Training in soldering and electronics (Arduino) and 3D software (Catia)
- Participation in association projects and activities

Education

Pre-Master of Science (3 years)

From 2025 to 2028 **EPITECH** | Le Kremlin-Bicêtre, France

- Specialization: IoT Connected Objects

Bachelor 2 of Engineering (2 years)

From 2023 to 2025 **SUPINFO** | Paris, France

BTS MCO (Commercial Management) - High Honors (2 years)

From 2020 to 2022 **Lycée Marie Curie** | Versailles, France

2 February 2026

Subject: Application for a 31-Month Apprenticeship in Robotics, Embedded Systems & IoT - Available Immediately

Dear Sir or Madam,

As a third-year computer science student at EPITECH Paris, my academic journey has allowed me to develop a strong interest in robotics, embedded systems, and intelligent automation. I am seeking to join a team where I could work on concrete robotics challenges (autonomous navigation, system simulation, sensor/actuator integration), while learning and actively contributing to projects.

I have had the opportunity to develop technical skills such as Python, C/C++, ROS 2, Gazebo, as well as Git and Arduino through several personal and academic projects: simulation of a 3DOF robotic arm with URDF/XACRO modeling and `ros2_control` integration, design of an autonomous Lego Technic robotic arm with sensors and motors, and Odyssée du Dé, a board game in Java with LibGDX (modular architecture, JUnit unit testing).

Since November 2025, I have also been training within EVOLUTTEK, EPITECH's robotics association, where I am learning soldering, Arduino electronics, and 3D modeling (Catia).

I am fluent in French, German, and English, both spoken and written.

Joining your company would represent an opportunity for me to integrate a technical team and put my skills to work on concrete projects. I am particularly motivated by the prospect of learning from experienced developers and fully investing myself in your team, your projects, and contributing to their success. This apprenticeship would allow me both to develop my skills and bring my rigor, technical curiosity, and commitment to your developments.

I particularly appreciate understanding robotic systems as a whole, from simulation to implementation, and developing solutions that work efficiently. What motivates me in robotics is the software development that brings machines to life: whether it's control architecture, sensor/actuator integration, or optimization of navigation algorithms. My versatile approach drives me to engage with all aspects of a robotic system, while maintaining a focus on code and software.

I am mobile across France and Germany (driving license B).

I would be delighted to discuss with you your company's needs and how I could contribute my motivation and versatility.

Looking forward to hearing from you, I remain,

Yours sincerely,

Timothée Pirot
