Timothée Pirot

SEEKING 31-MONTH APPRENTICESHIP (AVAILABLE IMMEDIATELY) IN DEVELOPMENT

Pursuing a Master's degree in IoT and Connected Objects at EPITECH (3-year program, enrolled 2025).

Seeking a 31-month apprenticeship, available immediately, in development (1 month in company / 2 weeks at school rhythm).

Mobile across France and Germany.

Work Experiences

Assistant Software Engineer Internship (2.5 months)

From July 2024 to September 2024 **Teads** | Montpellier, France

- Responsible for front-end integration of a recommendation feature into the existing interface

Seasonal Employment (5 years)

From 2018 to 2022 **Warema** | Marktheidenfeld, BY, Germany

- Production line work, rigor in industrial environment (3 months per summer)

Projects

Odyssée du Dé V2 - Modern Board Game (in development)

Since January 2026 **Personal project** (Java/LibGDX/Tiled)

- Migration from JSON-based maps to Tiled editor for scalable level design
- Web export for online play, UI/UX overhaul, improved AI

Odyssée du Dé - Modern Board Game (3 weeks)

From November 2025 to December 2025 **Student Project** (Java/LibGDX)

- Graphical interface, event system and AI for optimal move selection
- Unit testing with JUnit to validate business logic and game rules

JobyWan - Job application management platform (2 weeks)

From October 2025 to November 2025 **Student Project** (HTML/JS/PHP)

- Full-stack development of a job application tracking web app

Volunteer Experience

EVOLUTEK Member (Robotics Association)

Since November 2025 **EVOLUTEK** | EPITECH

- Training in soldering and electronics (Arduino) and 3D software (Catia)
- Participation in association projects and activities

Education

Pre-Master of Science (3 years)

From 2025 to 2028 **EPITECH** | Le Kremlin-Bicêtre, France

- Specialization: IoT Connected Objects

Bachelor 2 of Engineering (2 years)

From 2023 to 2025 **SUPINFO** | Paris, France

BTS MCO (Commercial Management) - High Honors (2 years)

From 2020 to 2022 **Lycée Marie Curie** | Versailles, France

Subject: Application for a 31-Month Apprenticeship in Development - Available Immediately

Dear Sir or Madam,

As a third-year computer science student at EPITECH Paris, my academic journey has led me to develop a strong interest in designing robust software solutions, optimizing performance, and solving complex technical problems. I am looking to join a team where I can work on real-world development challenges while learning and actively contributing to projects.

I have developed technical skills including Python, Java (LibGDX, JUnit), JavaScript, TypeScript, React, SQL, as well as Git, Gradle and Postman through several student projects: JobyWan, a job application management web platform (REST API, JWT authentication, SQL database), and Odyssée du Dé, a Java board game with LibGDX (modular architecture, JUnit unit testing).

During my internship at Teads, I also gained familiarity with modern web architectures, REST APIs and server-side performance challenges.

I am fluent in French, German, and English, both spoken and written.

Joining your company would be an opportunity for me to integrate a technical team and apply my skills to real-world projects. I am particularly motivated by the prospect of learning from experienced developers and fully investing myself in your team, your projects, and contributing to their success. This work-study program would allow me to grow my skills while bringing my rigor, technical curiosity, and commitment to your development efforts.

I particularly enjoy debugging, understanding the underlying architecture of an application, and implementing solutions that work efficiently. My system optimizer mindset drives me to seek ways to improve performance and structure code in a clear and maintainable manner.

I am mobile across France and Germany (driving license B).

I would be delighted to discuss with you your company's needs and how I could contribute my motivation and versatility.

Looking forward to hearing from you, I remain,

Yours sincerely,

Timothée Pirot
